

SILVER PICK IS SHOWING HIGH GRADE ORE BODY

Splendid Showing Is Resulting on Both the Intermediate and Fourth Levels

Another orebody is being entered on both the intermediate and fourth levels of the Silver Pick lease on the Red Top in the opinion of the management. North on both these levels conditions are regarded as being highly promising. Good ore has been found and the formation is the best opened in any work since prospecting was started north from the big stope above the intermediate level. On both the fourth and intermediate there are four five and six-foot widths of 15 to 25 material and mixed with this is the Silver Pick handles at a profit.

Both north drifts are being continued and in addition to this a raise is being driven on the intermediate and a winze is being sunk from the fourth. So much ore has been found in the winze and the formation is so good that work has been started on a 250-foot crosscut on the second level of the Laguna to prospect below the winze. The second level of the Laguna is the next below the fourth of the Red Top.

The Silver Pick has acquired the Van Dornum and Childers lease on the Combination, regarded as being one of the best prospects in the Consolidated mines. The Pick is now handling a carload of ore mined by Van Dornum and Childers and is preparing to hoist another. The value of the ore is difficult to judge, because of the widely varying grades in the carload, but the value is estimated to be anywhere from \$25 to \$60 a ton. Some of the ore assays \$700 to \$900.

The leased block is entered through the old Sheets-Ish shaft, which is at the bottom of one of the big Combination "Story holes." The Pick is erecting a head-frame at the edge of the hole and will run track to the collar of the shaft. An electrically driven hoist will be used. The ore is in a faulted vein at a depth of 150 feet, a condition roughly similar to that in the leased Red Top block. The vein is being mined 150 feet from the Silver Pick-Combination boundary line, and it is striking toward the Pick company ground, west of any of the Pick workings. This makes the territory between the Sheets-Ish shaft and the boundary line a good field for prospecting.

The Pick will sink a 100-foot winze in the vicinity of the Sheets-Ish shaft, and will drift west from this, and possibly work from the Silver Pick shaft.

BULLION SHIPMENT MADE BY WEST END

The first shipment of bullion to be sent out for the first half of October was credited to the West End Consolidated Mining company, the consignment being billed out today. It consisted of 30 bars, weighing 57,600 ounces, and having a value estimated at \$67,000. This was against \$75,000 for the last half of September, but is well within keeping with that of past months. It is expected that from this time forward an increased output will result.

Remember the job printing department of The Bonanza is the most complete and up-to-date in the state.

OLD-TIME RESIDENT IS CALLED TO REWARD

Edward McGuinness, aged 43 years, a well-known leaser of the Tonopah district for the last ten years, died last night at 8:30 o'clock at the county hospital following an illness of some duration. Deceased was admitted to the hospital a little over a week ago, suffering from a general breakdown, and he continued to fall until death relieved his suffering. He had been on a prospecting trip and took a bad cold, and friends brought him to Tonopah, believing he was suffering from pneumonia. The only known relative is Paddy McGuinness, who left here several months ago for Randsburg, but inquiry as to that place elicited the fact that he had left there with the announcement that he was going to Seattle.

SILVER KING DIVIDE BUYS NEW PROPERTY

Silver King Divide has acquired a group of ten claims in Nevada across the state line from Los Plumas Junction, in California, on the Western Pacific railroad from L. T. and D. E. Brockbank, according to an official announcement just made. This property was a shipper in the years ago, but has been closed down by the George A. Skinner estate.

There are two parallel veins on the property, one a silver, gold and copper formation from 25 to 35 feet wide, while the smaller vein is from six to eight feet wide, carrying gold only. The development at present consists of two short tunnels tapping the vein on the upper level and a lower tunnel that is now 500 feet long and within 40 or 50 feet of the vein. If the pitch of the vein remains the same, the lower tunnel will intersect the ore shoot at a point that will give the mine approximately 600 feet of backs.

The ore, from the data of former shipments, averages between \$45 and \$60 a ton and is exceptionally amenable to treatment.

ESTEEMED MANHATTAN WOMAN ANSWERS CALL

The home of M. J. Kelly, constable at Manhattan, is bowed in grief as the result of the death of Mr. Kelly's mother, which occurred last evening. Mrs. Kelly was 80 years of age and had been an invalid for some time, having suffered a stroke of paralysis. She came to Manhattan from Lakeport, Calif., to make her home with her son, Frank J. Cavanaugh, the undertaker, was called to Manhattan to take care of the remains and prepare them for burial.

OVERCOME BY HEAT

George Miller, who is employed as a miner on the 1490 level of the Tonopah Divide mine, was overcome by heat yesterday afternoon and was found unconscious near the station. He was brought to the Mine Operators' hospital in Tonopah, where treatment was administered. The collapse was credited to his taking a drink of ice water. The patient will be up and about in a few days.
